Summary

I've wrapped up my web projects and am now diving into the latest tech, like the **Google Maps API**, **Razorpay**, and **Vercel**. I've also snagged some **Coursera** certifications to level up my tech skills, and I wrapped up a two-month **AICTE** internship. I'm pretty good at managing my time, designing user interfaces, and solving problems. I'm really excited to create cool, easy-to-use web apps! I'm also looking forward to getting my hands dirty in creative projects and gaining real-world experience through a frontend or full-stack development internship.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering Sept 2023 – May 2027

Ramaiah University of Applied Sciences

- **Coursework:** Computer Architecture, Comparison of Learning Algorithms, Computational Theory

2021 – 2023

12th

College of Basic Sciences and Humanities, Bhubaneswar

- **Coursework:** PCM IT, Science

2021

10th

Khaira Govt. High School, Khaira, Balasore

Experience

Frontend Developer Intern – AICTE Virtual Internship (Remote)

May 2024 – July 2024

Built responsive web interfaces using **HTML**, **CSS**, and **JavaScript**. Enhanced performance via **API integration** and optimized UI/UX using **vibe coding** techniques.

Java Developer Intern – CTTC, Bhubaneswar

July 2025 – Aug 2025

Worked on **Core Java** applications focusing on **OOP concepts** and **database connectivity**, improving backend programming proficiency.

Projects

Bus Ticket Booking Website

Jan 2024 – Present

Developed a full-featured bus booking platform with **admin**, **operator**, and **passenger** modules. Integrated **Google Maps API** and **Razorpay** for real-time tracking and payments. Deployed via **Vercel** with custom domain setup.

Disaster Alert System

Built a real-time disaster alert web app using **Python Flask**, **HTML/CSS**, and APIs for data visualization. Added interactive map for live alerts. *Repo:* github.com/Subhra1432/Disaster-Alert-System

SwasthyaSaathi

Created a healthcare web app for **doctor-patient management** with features like appointment booking, records, and secure login using **Flask** and **JavaScript**. *Repo:* github.com/Subhra1432/SwasthyaSaathi

Technologies

Languages: Python, C, C++ , Java, JavaScript, PHP, HTML, CSS, SQL

Frameworks & Tools: Flask, Node.js (basic), Bootstrap, Tailwind CSS, Vercel, GitHub

Databases: MySQL, SQLite, MongoDB, Supabase

APIs & Integrations: Google Maps API, Razorpay API, Weather API

Other Skills: Prompt Engineering (Vibe Coding), Web Deployment, UI/UX Optimization
